Initial Pain Assessment

By answering the following questions, you will help your physician better understand and treat your pain.
As far as you know, what is the cause of your pain? When did your pain problem start? _____

What doctors have you seen? When did you see them? What did they do?
Doctor's Name _____ Month/Year Seen _____ What treatment was done _____

What tests and studies have been done?
Tests & Studies (MRI, CT-Scan, X-Rays) _____ Month/Year Done _____

Substance Use

Which of the following drugs or substances, if any, have you used in the past? (Circle all that apply)
Next to each drug or substance that you've circled, indicate if you used it occasionally ("O"), frequently ("F") or continuously ("C").

Alcohol _____	Barbiturates _____	Cocaine _____
Heroin _____	Amphetamines _____	Marijuana _____
Other _____	Other _____	Other _____

Are you presently using any of the drugs or substances below? (Circle all that apply) Next to each drug or substance that you've circled, indicate if you use it occasionally ("O"), frequently ("F") or contin ("C").

Alcohol _____	Barbiturates _____	Cocaine _____
Heroin _____	Amphetamines _____	Marijuana _____
Other _____	Other _____	Other _____

Do you presently smoke cigarettes or use tobacco in any form? Yes _____ No _____
If not, did you ever smoke cigarettes or use tobacco in the past? Yes _____ No _____
How many packs do (did) you smoke per day? _____ For how many years? _____

**PAIN CENTER NJ
ASMA SIDDIQUI, M.D.
329 SUMMERHILL ROAD
EAST BRUNSWICK, NJ 08816
TELE 732-636-7888 FAX 732-636-7887**

Please be advised that our office will **not** be writing/issuing duplicate prescriptions for **LOST, STOLEN, DESTROYED ETC.** for any narcotic medications. Please note it is your responsibility to handle and store your medications safely. In the event that your narcotic medications are lost, stolen, destroyed you need to call the DEA (Drug Enforcement Agency). They will investigate your claim and take appropriate action.

You will be discharged for the failure of urine drug test if positive for suboxone, methadone, illicit drugs and/or any drugs not prescribed by Dr. Siddiqui. **THERE WILL BE NO EXCEPTIONS!**

Others reasons you will be discharged are:

- Obtaining narcotic prescriptions from multiple physicians.
- Failure to follow treatment protocols recommended by Dr. Siddiqui.
- Aberrant/ Addictive behavior.
- Persistently calling/coming into the office asking for early medication refills.

Dr. Siddiqui does not prescribe Xanax, Valium, or any other medications for anxiety or depression; You will need to follow up with a psychiatrist and psychologist.

Urine testing is done monthly when you come to your medication refill appointment and you will also be called into our office at random to conduct additional urine tests as well as random pill counts.

If any medical complications/allergic reactions arise, please go straight to your nearest hospital/emergency room and contact us from there.

In addition to seeing Dr. Siddiqui you must have a primary care physician who does your annual exam. If this has not been done, you must do this as soon as possible. The primary care physician will be responsible to treat you for all your general medical conditions except pain and also provide that doctor with a list of medications Dr. Siddiqui prescribes to you. If you have medical complications due to not following up with a primary care physician, you will not hold Dr. Siddiqui's office responsible for such complications and release Dr. Siddiqui of any and all liability of any pain and suffering.

I have read and understand all of the above and all of my questions have been answered to my satisfaction.

Consent for Chronic Opioid Therapy

Dr. Siddiqui is prescribing opioid medicine, sometimes called narcotic analgesics, to me for a diagnosis of _____.

This decision was made because my condition is serious or other treatments have not helped my pain.

I am aware that the use of such medicine has certain risks associated with it, including, but not limited to: sleepiness or drowsiness, constipation, nausea, itching, vomiting, dizziness, allergic reaction, slowing of breathing rate, slowing of reflexes or reaction time, physical dependence, tolerance to analgesia, addiction and possibility that the medicine will not provide complete pain relief.

I am aware about the possible risks and benefits of other types of treatments that do not involve the use of opioids. The other treatments discussed included: _____.

I will not be involved in any activity that may be dangerous to me or someone else if I feel drowsy or am not thinking clearly. I am aware that even if I do not notice it, my reflexes and reaction time might still be slowed. Such activities include, but are not limited to: using heavy equipment or a motor vehicle, working in unprotected heights or being responsible for another individual who is unable to care for himself or herself.

I am aware that certain other medicines such as nalbuphine (Nubain), pentazocine (Talwin), buprenorphine (Buprenex), and butorphanol (Stadol), may reverse the action of the medicine I am using for pain control. Taking any of these other medicines while I am taking my pain medicines can cause symptoms like a bad flu, called a withdrawal syndrome. I agree not to take any of these medicines and to tell any other doctors that I am taking an opioid as my pain medicine and cannot take any of the medicines listed above.

I am aware that addiction is defined as the use of a medicine even if it causes harm, having cravings for a drug, feeling the need to use a drug and a decreased quality of life. I am aware that the development of addiction has been reported rarely in medical journals and is much more common in a person who has a family or personal history of addiction. I agree to tell my doctor my complete and honest personal drug history and that of my family to the best of my knowledge.

I understand that physical dependence is normal, expected result of using these medicines for a long time. I understand that physical dependence is not the same as addiction. I am aware physical dependence means that if my pain medicine use is markedly decreased, stopped or reversed by some of the agents mentioned above, I will experience a withdrawal syndrome. This means I may have any or all of the following: runny nose, yawning, large pupils, goose bumps, abdominal pain and cramping, diarrhea, irritability, aches throughout my body and a flu-like feeling. I am aware that opioid withdrawal is uncomfortable but not life threatening.

I am aware that tolerance to analgesia means that I may require more medicine to get the same amount of pain relief. I am aware that tolerance to analgesia does not seem to be a big problem for most patients with chronic pain, however, it has been seen and may occur to me. If it occurs, increasing doses may not always help and may cause unacceptable side effects. Tolerance or failure to respond well to opioids may cause my doctor to choose another form of treatment.

(Males only) I am aware that chronic opioid use has been associated with low testosterone levels in males. This may affect my mood, stamina, sexual desire and physical and sexual performance. I understand that my doctor may check my blood to see if my testosterone level is normal.

(Females only) If I plan to become pregnant or believe that I have become pregnant while taking this pain medicine, I will immediately call my obstetric doctor and this office to inform them. I am aware that, should I carry a baby to delivery while taking these medicines, the baby will be physically dependent upon opioids. I am aware that the use of opioids is not generally associated with a risk of birth defects. However, birth defects can occur whether or not the mother is on medicines and there is always the possibility that my child will have a birth defect while I am taking an opioid.

I have read this form or have had it read to me. I understand all of it. I have had a chance to have all of my questions regarding this treatment answered to my satisfaction. By signing this form voluntarily, I give my consent for the treatment of my pain with opioid pain medicines.

Long-term Controlled Substances Therapy for Chronic Pain

The purpose of this agreement is to protect your access to controlled substances and to protect our ability to prescribe for you.

The long-term use of such substances as opioids (narcotic analgesics), benzodiazepine tranquilizers, and barbiturate sedatives is controversial because of uncertainty regarding the extent to which they provide long-term benefit. There is also the risk of an addictive disorder developing or of relapse occurring in a person with a prior addiction. The extent of this risk is not certain.

Because these drugs have potential for abuse or diversion, strict accountability is necessary when use is prolonged. For this reason the following policies are agreed to by you, the patient, and consideration for, and a condition of, the willingness of the physician whose signature appears below to consider the initial and/or continued prescription of controlled substances to treat your chronic pain.

1. All controlled substances must come from the physician whose signature appears below or, during his or her absence, by the covering physician, unless specific authorization is obtained for an exception. (Multiple sources can lead to untoward drug interactions or poor coordination of treatment.)
2. All controlled substances must be obtained at the same pharmacy, where possible. Should the need arise to change pharmacies, our office must be informed. The pharmacy that you have selected is _____ phone _____.
3. You are expected to inform our office of any new medications or medical conditions, and of any adverse effects you experience from any of the medications that you take.
4. The prescribing physician has permission to discuss all diagnostic and treatment details with dispensing pharmacists or other professionals who provide your health care for purposes of maintaining accountability.
5. You may not share, sell, or otherwise permit others to have access to these medications.
6. These drugs should not be stopped abruptly, as an abstinence syndrome will likely develop.
7. Unannounced urine or serum toxicology screens may be requested, and your cooperation is required. Presence of unauthorized substances may prompt referral for assessment for addictive disorder.
8. Prescriptions and bottles of these medications may be sought by other individuals with chemical dependency and should be closely safeguarded. It is expected that you will take the highest possible degree of care with your medication and prescription. They should not be left where others might see or otherwise have access to them.
9. Original containers of medications should be brought in to each office visit.
10. Since the drugs may be hazardous or lethal to a person who is not tolerant to their effects, especially a child, you must keep them out of reach of such people.
11. Medications may not be replaced if they are lost, get wet, are destroyed, left on an airplane, etc. If your medication has been stolen and you complete a police report regarding the theft, and exception may be made.
12. Early refills will generally not be given.
13. Prescriptions may be issued early if the physician or patient will be out of town when a refill is due. These prescriptions will contain instructions to the pharmacist that they are not to be filled prior to the appropriate date.
14. If the responsible legal authorities have questions concerning your treatment, as might occur, for example, if you were obtaining medications at several pharmacies, all confidentiality is waived and these authorities may be given full access to our records of controlled substances administration.
15. It is understood that failure to adhere to these policies may result in cessation of therapy with controlled substance prescribing by this physician or referral for further specialty assessment.
16. Renewals are contingent on keeping scheduled appointments. Please do not phone for prescriptions after hours or on weekends.
17. It should be understood that any medical treatment is initially a trial, and that continued prescription is contingent on evidence of benefit.
18. The risks and potential benefits of these therapies are explained elsewhere (and you acknowledge that you have received such explanation).

19. You affirm that you have full right and power to sign and be bound by this agreement, and that you have read, understand, and accept all of its terms.
